

Workshops

Workshop title	Content includes:	Curriculum Links
Habitats	Woodland Animal Hunt; making your own animal habitat; minibeast traps and their homes; pond life; human impact for better and worse.	Science NC – Living things and their habitats; Working scientifically; Seasonal changes PSHE – Living in the wider world
Minibeasts & why we don't need to be scared of them	Meet our stick insects and look at camouflage in nature; learn how to make your own minibeast traps and where to put them; butterfly netting (seasonal); invertebrate surveys; why we need minibeasts.	PSHE – Caring for animals Science NC – Animals, including humans; Working scientifically Geography – Field studies
Plants – our real life heroes	Swing from tree swings and find plants from the time of dinosaurs; discover some mind-bending and life-saving tree facts and go on a woodland tree hunt.	Science NC – Plants; Working scientifically; Seasonal changes PSHE – Living the wider world
Refugee Workshop – necessities for life.	A look at what life is like for people forced from their homes – a practical session involving shelter construction, fire-building and finding food and clean water in nature.	Science NC – Every materials D&T – Design, make and evaluate; Cooking and nutrition PSHE – Living the wider world; Health and wellbeing
Survival Skills	Learn skills for surviving in the wild. Just like the rest of the animal kingdom we need shelter, warmth and food. A fun and active workshop building fires, construction shelters and hunting for food!	Science NC – Animals, including humans; Living things and their habitats; Plants; Materials D&T – Design, make and evaluate; Cooking and nutrition
Archaeology for Kids	Children get digging and discovering on our archaeological dig site and go in search of treasure with metal detectors. Sessions can be tailored to your history topic to make an inspiring real-world entry or exit point.	Science NC – Working scientifically; Everyday materials; Rocks; Geography – human and physical geography

Workshops (continued)

Workshop title	Content includes:	Curriculum Links
Recycling for Nature – Sustainability in the Modern World	Learn about sustainable living on a local and global level. Children have the opportunity to make a range of items from notebooks, wallets and jewellery to birdfeeders and minibeast traps, all from everyday waste items.	PSHE – Living in the wider world Science NC – Materials D&T – Design, make and evaluate
Changing the Face of the Planet – a planet forever changed by human endeavour	An Environmental Geography workshop where we look at human impact on the land in the most unexpected ways – not all of them bad!	Science NC – Working scientifically; Living things and their habitats Geography – Locational awareness; Human and physical geography PSHE – Living in the wider world
Where am I? – Orienteering adventures!	A range of progressive active and fun activities allowing children to build mapping skills and confidence in a natural setting. The finale is the orienteering team score event. The children will learn life-long skills while developing vital independence and inter-dependence skills	Geography – Geographic skills and Mapwork PSHE – Relationships; Living in the wider world
Team Building Challenge Workshop	Your children face a series of challenges where working together will win the day. We have a permanent team building area and climbing/bouldering area (climbing available Summer term 2018) which will help your children hone their interdependence skills.	PSHE – Relationships; Living in the wider world D&T – Design, make and evaluate
